#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-28 are rejected under 35 U.S.C. 103(a) as being unpatentable over Gorin 696' in view of Okumura.

Gorin teaches the claimed multiple plasma chambers , see figures 1-3, but does not specifically mention control of backpressure from the chambers to the gas source. The patent to Okumura is applied for teaching the same as conventional, note gate valve 4. Use of the same effect more pressure control of the plasma, which is beneficial. In view of this teaching it would have been obvious to modify the Gorin system with back flow prevention means for the inlet gas flow, to effect a processing having more control of the chamber output plasma flow. AS per dependent claims note figure 3 showing two input flows into a single chamber and figure 2 which shows a cascaded flow from into chamber into another, i.e., series and parallel combinations.

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Fujimura et al, Li et al and Pennington are cited for disclosing pertinent plasma processing systems of interest.
